PROJECTS

FACTORY MANAGEMENT SYSTEM - SRI LANKAN APPAREL INDUSTRY, *Information Technology Project* 2022

Created a web application using MERN stack and Tailwind, which uses an internet platform that will provide an integrated and automated system with easy accessibility that aids in regulating business operations with minimum complications. This web application contains eight main business functions namely Stock, Sales, Employee and Salary, Production, Machinery and maintenance, Supplier, Transport, and Financial management. This system will allow the smooth management of the core business aspects by allowing easy administering and monitoring of tasks.

HEALTH AND NUTRITION MOBILE APPLICATION - SCULPTR, *Mobile Application Development Project* 2022

The Sculptr is a Health and Nutrition mobile application developed using Android Studio which gives many important uses for people including the creation of a diet plan, monitoring your everyday caloric consumption, keeping track of water usage, tracking one's physical activity, monitoring your intake of carbohydrates, fats, and weight reduction.

EVENT MANAGEMENT SYSTEM - EVENTZ, *Object Oriented Programming Project* 2022

Eventz is a website developed using Java with the usage of OOP concepts which can be used for an event managing system.

E-COMMERCE WEBSITE, *Interent And Web Technologies Project* 2021

Developed a website for an online store using basic web development languages such as PHP, Html, CSS, and JavaScript.
